

Help us learn more about the ways Autistic children grow and develop

TAKE PART IN RESEARCH

What is the PARC Study?

We are a research team looking to gather information **about newly-diagnosed Autistic children** and their families.

We are asking about child symptoms, skills, functioning and abilities, as well as about their family life. Gathering this data early in life can help us understand developmental outcomes in Autistic children.

To show our appreciation for taking the time to fill out the questionnaires, we provide a \$20 gift card to a store of your choice with each questionnaire package that is completed.

What will my participation involve?

We will ask you to complete a set of online questionnaires (taking about 2-3 hours total) **repeated every 6 months until study exit (age 6)**.

Why participate?

The information we collect can help us learn about the strengths and needs of children and families. You will also receive **research summary reports** to track how your child's symptoms, skills, and abilities may be changing over time.
